### Abstract

1. Some products of the interaction of dibromoethylenes and tribromoethylene with cyclic dienes were produced. 2. The dipole moments of trans-5, 6-dibromonorbornene, 9-bromodihydroethyleneanthracene, and endo-cis-5, 6-dibromohexachloronorbornene were measured. 3. The PMR of dibromohexachloronorbornene was studied. 4. The steric course of the reaction of diene synthesis of dibromoethylenes with cyclopentadiene and hexachlorocyclopentadiene was studied. © 1966 Consultants Bureau.
